
<p>Instructional Goal To provide a graduate level public health education built on public health competencies for students and health professionals within a framework of social justice, health equity and determinants of health. Rationale: The capstone series in the MPH program is designed for students to interact and create professional programs in their workplace.</p>	<p>Applied Practical Experience All MPH students will complete a supervised professional experience capstone project.</p>	<p>Completion of course assignments in Capstones 2. Rationale: MPH students work with Lamar supervisors to use critical thinking skills to develop a project that will impact on the population they wish to serve. Study topic, population and research question should be defined.</p>	<p>Developing the reference list 30 points</p> <p>This is a refining process.</p> <p>1. Find relative literature (if a search yields hundreds of items use MESH terms of other mechanism to reduce the topic).</p> <p>several articles that address the topic in a way you want, use their reference list to find similar research.</p>			

write down
items like
research
questions
,method info
(subjects,
instruments,
etc) to help
refine your
question and
population.

reference list
and literature
review to your
more specific

gathered that
you will be
utilizing.

need for a
specific group
to be studied.
If not, examine
whom has been
studied in the
method section
of your articles
for possible
answers.

This was part of
your Capstone
one and if you
have your
population
simply say who
they are and
why you have
chosen them
(subject of
interest, there is
need to study
group, etc).

Literature
Review (50
points)

Literature
review should
include:
Introduction

pages to
include the
research
q 1 81.7.TÆTQq3

			pages in APA format (this may still be broad at this point)			
--	--	--	---	--	--	--

Submission of professional proposal

survey etc.)
This could be
data base used
to conduct the
study.
c. Describe any
instrument to
be utilized,
Survey etc.
d. What
analysis might
be utilized.

Look at similar
research
methods for
common
instruments and
analysis, this
can not only be
helpful for
writing your
methods but is
important when
conducting
research in an
area.

CITI
